AI & DATA ANALYTICS LEAD

/

DATA DELIVERY PROJECT MANAGER

APPLIED DATA SCIENTIST

/

MACHINE LEARNING ENGINEER

ACADEMIC EDUCATION

Professional Machine Learning Engineer

(Google Cloud Certification, 2025)

Postgraduate Web Conversion Optimization (CRO, UX)

(Kschool, 2015)

Master Digital Analytics

(Kschool, 2012)

STATISTICS AND OPERATIONAL RESEARCH

(U. Complutense Madrid, 1996)

Academic Honor in ' Statistical Information Analysis '

(U. Complutense Madrid, 1996)

PROFESSIONAL EXPERIENCE

EL CORTE INGLÉS - AI Delivery Project Manager / Applied Data Scientist (e2e)

2024-2026

- **Coordinating Artificial Intelligence and Machine Learning solutions** from requirements gathering through to deployment, model monitoring, quality control and scalability management.
- **Managing the AI Delivery team (data scientists, data engineers) to support multiple areas of the company**
 - Cross-selling recommendation algorithms for the E-commerce department
 - Application of LLM and clustering for the categorization of customer reviews and requests
 - Employee churn prediction for the HR department
 - Optimization algorithm for order fulfilment in physical stores
 - RAG and LLM for advising employees and online customers
- **SUCCESS:** 12 models in production, coordinating 10 people and 20 projects
- Technologies: **Jira, Python, SQL, MLFlow, Notebook LLM, VSCode, Claude Code, Github Copilot**

MAKING SCIENCE – DS / Data Solution Expert / Delivery Project Manager (e2e)

2021-2024

- **Collaboration on the design of products, data solutions, and predictive and advertising investment optimisation algorithms** for our clients (6 in production, BrandMax, Gauss AI Smart Advertising)
- **Development data pipelines for implementing Lead Scoring and LTV models** for Bahía Príncipe Hotels, Luisa Via Roma, Jobrapido and UNIR, among others top-tier clients. **SUCCESS STORIES** that deserved recognition at **Think with Google** thanks to achieve +27% conversion rate, +6% ROAS growth, +10% profit - 9% CpC.
- **Leading international Gauss AI Smart Advertising projects**, which focused on activation and Marketing Intelligence, successfully pushing our clients to next levels of performance. With **predictive bidding** and **advanced analytic visualizations**, achieved operational efficiencies.
- Definition of the **catalogue of AI and advanced analytics use cases** with a focus on performance and strategic proposals for clients.
- Technologies: **Python, SQL, MLFlow, GA, GTM, GCP (BigQuery, Vertex AI, Cloud Functions, Cloud Pub/Sub)**

EL ARTE DE MEDIR Consulting - Business and Digital Analytics Consultant

2014-2021

- By **SANITAS** and **VIAJES EL CORTE INGLÉS**:
 - Strategic analysis: **Decision-boards** design with **KPI's** carefully adapted to the business model.
 - Tactical analysis: **navigation flows, conversion funnel analysis** and **campaign tracking**
 - **SUCCESS:** Data modeling and strategic consulting of the **CRM** project for **Viajes El Corte Inglés**.
- By **SMARTME ANALYTICS**:
 - Optimization, automation of **algorithms coded in R** for cross-media consumption **KPIs** analysis. (**R** and **Tableau**)
- By **GLOBAL MEDICAL KNOWLEDGE**
 - Implementation of the **measurement strategy** and campaign performance **KPI's** (**G. Analytics** and **GTM**)
 - **Decision-boards** generation about **performance & usability** of the **digital simulation platform (PowerBi)**

- **SUCCESS:** Performance analysis algorithm analyzing business indicators (life cycle, activity ..)
- Tracking campaigns, traffic sources and key business metrics (website and mobile version).

MERCEDES-BENZ ESPAÑA - Responsible for BBDD, CRM and Research

2000-2010

- **Segmentation algorithms:** elaboration of the Customer Life-Time Value and Lead Scoring.
- Ad-hoc research studies, both local and coordinated with Germany Headquarters: Profile studies, service satisfaction, Mystery shopping, Image monitor, Advertising tracking,
- **Analysis and qualification of the Customers and Leads DB** (MB, smart, Maybach).
- Management of acquisition and loyalty campaigns, call center coordination and development of online channel
- **SUCCESS:** - average age of customers lowered by 6 years, meaning we increased CLV by +20%
- I received an international benchmark award for database quality and qualification strategies

DRAFT WORLDWIDE Marketing agency - Database Analyst and Geolocation (GIS) 1997-2000

- **Coding and analysis** (profiling, segmentation, etc. with SPSS, Arcview for CajaDuero, Grupo Ugarte).
- **BERTELSMANN ESPAÑA, G + J:** SAS programming algorithm, client's ddbb consulting (Volvo, Uni2, Camel, Endesa)

EXPERIENCE IN THESE AREAS OF KNOWLEDGE

- **Programming & Machine Learning:** ETL process, MLOps, data wrangling, feature engineering, LLMs, LangChain, RAG, app deployment, advanced prompting techniques, multi-agent ML workflows
Tools: Python, R, SQL, dbt, Github, Bitbucket, VSCode, MLFlow, Notebooks, GCP (BQ, Vertex AI)
- **Applied Data Science & Statistics:** Data analysis, data modelling, model validation, predictive algorithms, clustering/segmentation, classification models, decision trees, optimization, regression and inference, time series forecasting, explainable AI. *Tools: SPSS, SAS, Knime, BigML*
- **Business Intelligence & Digital analytics:** sales & marketing analytics, KPI's, text analytics, customer life time value, CRM management, CRO - web optimization, test A/B, sales funnels
Tools: SQL, Excel, Access, Airtable // GA, GTM, Adobe, Optimizely, Hotjar
- **Visualization & Reporting:** Decision boards, data storytelling, Geospatial analysis, social network analysis, Graph analysis
Tools: Tableau, Power BI, Looker, Shiny, Streamlit / ArcoGIS, CartoDB, Leaflet / Neo4j, Gephi
- **Customer Research:** UX - design thinking, buyer persona, qualitative research, quantitative research
Tools: Salesforce, SugarCRM
- **Data Project Management:** end-to-end execution, business requirements definition and translation into technical tasks, coordination of cross-functional teams and international clients, agile approach, MLOps (deployment and maintenance of models in production), deadlines and deliverables management, and stakeholder communication.
Tools: Jira, Git, Trello, Monday, Kanban, Slack, Agile
- **AI agents, process automation:** *Tools: Copilot, ChatGPT, Claude, Make, n8n*

PROFESSIONAL AND ATTITUDINAL STRENGTHS

ENGLISH Medium level - Official Language School Diploma (B2.2) , 10th Grade Trinity College London (C1)

- Ability to translate business issues into analytical solutions and complex algorithms to non-technical audience.
- Adaptability and integration to any work environment; customer relationship skills and teamwork.
- Curiosity, great capacity for learning, planning and management of complexity, analysis and synthesis.
- Resilience and tenacity. Responsibility and perseverance. Analytical, convergent and critical thinking.

More than 120 completed courses. Lifelong learning for lifetime improvement.

See it live here: <https://pilarhrod-knowledge-history-dashboard.streamlit.app>

Dear hiring team,

Always ready to take on new challenges and seize this opportunity to continue developing myself, and enjoy contributing my knowledge and business acumen acquired throughout my professional career.

With over 15 years of experience in the **end-to-end implementation of data solutions, from design through to production deployment**. By applying advanced analytics and marketing intelligence in international contexts, I have had the opportunity to **evolve from purely analytical roles into end-to-end leadership of initiatives that transform business challenges into AI-driven data projects with commercial impact**.

My experience combines analytical rigour—handling the technical complexities of **machine learning in production**—**with a strategic vision** that enables me to **translate business needs into measurable and scalable AI-based solutions**.

Key aspects of my versatile profile:

- ✓ **Data product design and development:** I have led hands-on data-driven transformation projects throughout the entire data lifecycle:
 - from gathering requirements in client meetings,
 - understanding the business and strategic alignment,
 - developing data pipelines and automating analytical workflows,
 - parameterising and validating descriptive/predictive models,
 - implementing models in production environments,
 - through to monitoring metrics via the design of executive decision boards.
- ✓ **Strong technical and product skills:** Proficient in SQL, R and Python, with hands-on experience in BigQuery, Google Cloud Platform (Vertex, Cloud Functions) and model lifecycle management tools (MLflow). Familiar with Agile methodologies, with a pragmatic focus on scalability, explainability and business impact.
- ✓ **Operational impact:** I consistently define KPIs and translate model performance into business metrics (increased conversion, ROAS, impact on cost per click, etc.), ensuring that analytical work delivers measurable results for senior stakeholders.
- ✓ **Client communication:** I regularly present complex analytical results to non-technical audiences, distilling data-driven process insights into clear visualisations and impact-driven recommendations—a fundamental requirement for consultancy engagements and for influencing executive decisions.
- ✓ **Cross-functional and international collaboration:** I have coordinated multidisciplinary (data, engineering, product, marketing and strategy) and geographically distributed teams, aligning technical deliverables with local business constraints and global objectives.

At **EL CORTE INGLÉS**, leading the **AI Delivery team (comprising data scientists and data engineers)**, I have been coordinating the development and automation of several **data solutions** and **AI, MLOps initiatives** tailored to the needs of each business unit, working closely with product owners, infrastructure teams and domain experts.

In my role at **Making Science** as a **Data Tech Delivery Project Manager and Applied Data Scientist**, managing international clients, **the success of my business proposals (74% won) led to the creation of a new Artificial Intelligence Business Unit** (Gauss AI Smart Advertising), where I have led multiple international business intelligence projects, coordinating multidisciplinary teams (Product, Data Scientists, Data Engineers and Analysts). I have established end-to-end methodologies for **projects that have achieved results recognised as success stories by Think with Google: +27% conversion, +6% ROAS, +10% profit and -9% CPC.**

Having worked across multiple sectors (retail, automotive, advertising, travel, recruitment, food delivery, insurance and hospitality) and in different environments (client, agency, consultancy and supplier), has enabled me to develop valuable, distinctive skills such as: communicating insights to executive audiences, **translating business needs into technical solutions that deliver tangible value**; and a **working approach that facilitates collaboration with stakeholders and suppliers, acting as the essential link between business, marketing and technology**; identifying opportunities whilst maintaining the big picture, ensuring the delivery of measurable results to assess the impact of initiatives, and **offering analytical recommendations that drive operational and commercial improvements.**

I am constantly updating my knowledge of machine learning and data process analytics; in fact, I am currently taking a bootcamp on **applying AI to data science and developing apps using LLMs, RAGs and workflows with AI agents.** I regularly attend numerous events and conferences related to **marketing analytics, customer experience (CX), business intelligence, AI-driven process automation and data science** – fields in which I wish to continue my professional career.

I am confident that my experience in **machine learning, applied analytics and data project management can deliver significant and tangible business value**, defining transformation strategies and turning data into a sustainable competitive advantage. Thank you for your time, and I am available to discuss any further details during an interview.

Un cordial saludo,
Pilar Hernanz
